Basic Information

- Place of Origin: China
- Brand Name: VOLITION
- Certification: ISO13485、FSC
- Minimum Order Quantity: 1
- Price: Negotiable
- Packaging Details: Standard Exportation Package
- Delivery Time: 7-15 work days
- Payment Terms: LC, T/T, D/P, PayPal, Western Union

Product Specification

- Type: Mobile
- Display Technology: DLP
- Resolution: Full HD (1920x1080)
- Power Supply: 110V/220V/380V
- Aspect Ratio: 16:9
- Highlight: **DLP veterinary dental radiography equipment, Full HD veterinary dental radiography equipment, DLP digital x ray machine veterinary**

Product Description

Product Description:

One of the standout features of this portable dental x ray machine is its connectivity options. With Wi-Fi, Bluetooth, HDMI, and USB connectivity, transferring and sharing images is quick and easy. You can connect to your preferred device to view and store images, making it simple to share with colleagues and patients.

Another major advantage of this machine is its full HD resolution, which gives you a clear view of the image to ensure accurate diagnosis. The resolution of 1920x1080 provides crisp and detailed images that are easy to read, making it an ideal choice for dental and veterinary professionals.

The Portable Digital X Ray Machine is also equipped with the latest operating system - Android TV 9.0, which is user-friendly and efficient. You can easily navigate through the features with its simple and intuitive interface, making it easy to use for all levels of professionals.

Whether you're a dentist or a veterinarian, this machine is a great investment. With its portability, you can easily move it around from one place to another, making it easy to take with you to different locations. This feature also makes it ideal for veterinary professionals who need to travel to different locations to provide dental care for animals.

In summary, the Portable Digital X Ray Machine is a reliable and high-quality panoramic radiograph machine that is perfect for dental and veterinary professionals. With its impressive output power, connectivity options, full HD resolution, and Android TV 9.0 operating system, this machine is a great investment for any professional looking to improve their diagnostic capabilities.

Features:

Product Name: Portable Digital X Ray Machine

Resolution: Full HD (1920x1080)

Brightness: 300 ANSI Lumens

Output Power: 40kw/32kw High Frequency Generator

Detector size: 17"x17"

Aspect Ratio: 16:9

Keywords: periapical xray machine, panoramic radiograph machine, dental radiograph machine

Technical Parameters:

Power Supply	110V/220V/380V
Aspect Ratio	16:9
Contrast Ratio	1000:1
Type	Mobile
Output Power	40kw/32kw High Frequency Generator
Display Technology	DLP
Sound System	Harman/Kardon Stereo Speakers
Screen Size	30-100 Inches
Detector Size	17"x17"
Model	XGIMI MoGo Pro

Applications:

One of the key applications of this product is its use as a periapical xray machine in the dental industry. Dentists can use this device to capture high-quality radiographs of teeth and surrounding structures. The mobile design of the VOLITION Portable Digital X Ray Machine makes it easy to move from one exam room to another, increasing workflow efficiency in a busy dental practice.

Veterinary dental x ray machines are also important tools for veterinary clinics. The VOLITION Portable Digital X Ray Machine is an ideal solution for capturing accurate radiographs of animals' teeth, jaws, and other structures. The mobile design of this device makes it easy to use in a variety of settings, from a busy veterinary clinic to a field location for animal rescue work.

Another application for the VOLITION Portable Digital X Ray Machine is as a dental radiograph machine in medical facilities. The device is capable of capturing high-quality images of the teeth and jaw, making it an essential tool for dental specialists. Its compact design and mobile capabilities make it easy to use in a variety of settings, from a busy hospital to a remote location for dental outreach work.

The VOLITION Portable Digital X Ray Machine is equipped with a 40kw/32kw High Frequency Generator and DLP display technology, ensuring that the images captured are of the highest quality. Its mobile design makes it easy to move from one location to another, making it an essential tool for dental and veterinary professionals, as well as medical facilities.
