

Custom Fluoroscope Radiology Medical Equipment Image Processing Dental Xray

Our Product Introduction

for more products please visit us on xray-system.com

Basic Information

- Place of Origin: China
- Brand Name: VOLITION
- Certification: ISO13485、FSC
- Minimum Order Quantity: 1
- Price: Negotiable
- Packaging Details: Standard Exportation Package
- Delivery Time: 7-15 work days
- Payment Terms: LC, T/T, D/P, PayPal, Western Union

Product Specification

- Image Processing: Digital Or Analog
- Type: Fixed Or Mobile
- X-Ray Generator: High Frequency Or Constant Potential
- Image Intensifier Material: Cesium Iodide Or Gadolinium Oxysulfide
- X-Ray Tube Cooling: Air Or Oil
- X-Ray Tube Focal Spot: 0.3-1.5 Mm
- Image Intensifier: 9 Inch Or 12 Inch
- Image Intensifier Resolution: 1.5-2.5 Lp/mm
- Highlight: **Fluoroscope radiology medical equipment,
Dental Xray radiology medical equipment,
Custom Fluoroscope dental xray equipment**

Product Description

Product Description:

Our Fluoroscope X Ray Machines have a Tube Current of 0.5-5 MA, which provides for precise and effective imaging. We offer Image Intensifiers in both 9 Inch and 12 Inch sizes to ensure that the machine is suitable for a wide range of applications. Our machines are available with Digital or Analog Image Processing, allowing you to choose the solution that best suits your needs. With Digital Image Processing, you can enjoy the benefits of faster and more accurate image processing, while Analog Image Processing provides a more traditional approach to image processing that is preferred by some users. Our Fluoroscope X Ray Machines are widely used in c arm radiology equipment and veterinary xray equipment. They are designed to be easy to use and highly effective, making them a popular choice among medical professionals and veterinarians alike. Whether you need to perform diagnostic imaging on humans or animals, our machines are the perfect solution for your needs.

Features:

Product Name: Fluoroscope X Ray Machines

Power Supply: AC Or DC

X-Ray Tube Focal Spot: 0.3-1.5 Mm

Image Intensifier Material: Cesium Iodide Or Gadolinium Oxysulfide

X-Ray Generator: High Frequency Or Constant Potential

X-Ray Tube Cooling: Air Or Oil

Our Fluoroscope X Ray Machines are perfect for veterinary dental radiography equipment, including our handheld xray unit and periapical xray machine.

Technical Parameters:

Technical Parameters	Options
Image Processing	Digital or Analog
X-Ray Tube Cooling	Air or Oil
Image Intensifier Magnification	1.5-2.5x
Tube Voltage	50-150 KV
Image Intensifier	9 Inch or 12 Inch
Tube Current	0.5-5 MA
X-Ray Generator	High Frequency or Constant Potential
Type	Fixed or Mobile
Power Supply	AC or DC
Image Intensifier Resolution	1.5-2.5 Lp/mm

For medical facilities looking for portable dental xray unit, digital dental x ray machine, or c arm radiology equipment, our Fluoroscope X Ray Machines product offers a range of technical parameters to suit your needs.

Applications:

These machines are essential for a variety of medical applications, including veterinary dental radiography equipment, digital x ray equipment, and portable dental xray unit. They can be used in various medical scenarios such as dental clinics, veterinary clinics, and hospitals. The VOLITION Fluoroscope X Ray Machines are specifically designed to meet the needs of medical professionals who require reliable, durable, and high-performance imaging equipment. The X-Ray Tube Cooling can be either Air or Oil and the Tube Voltage ranges from 50-150 KV.

In veterinary clinics, these machines are used to diagnose and treat animal health issues. With the help of these machines, the veterinarians can detect fractures, tumors, and other abnormalities in the animals' bodies. Similarly, in dental clinics, these machines are used for dental radiography, which is an essential part of dental diagnosis and treatment. The portable dental xray unit is particularly useful for dental professionals who need to travel to different locations to provide dental services.

The VOLITION Fluoroscope X Ray Machines are also suitable for use in hospitals, where they can be used to diagnose a range of medical conditions. These machines can help doctors to detect fractures, tumors, and other abnormalities in the human body. The high-quality images produced by these machines can be used to guide surgical procedures and monitor the progress of treatments.

Customization:

Brand Name: VOLITION

Place of Origin: China

Certification: ISO13485,FSC

Power Supply: AC Or DC

Image Intensifier Material: Cesium Iodide Or Gadolinium Oxysulfide

X-Ray Generator: High Frequency Or Constant Potential

Type: Fixed Or Mobile

Image Processing: Digital Or Analog
